Professional Summary

Data Analyst with 1+ years of professional experience in MIS reporting, financial analysis, business intelligence, and reporting automation across NBFC and IT environments. Skilled in Power BI, SQL, Advanced Excel, Python, DAX, MySQL, and Power Query for data preparation, analysis, visualization, KPI reporting, and management reporting. Experienced in developing interactive dashboards, automating recurring reports, analyzing business and financial data, and transforming raw datasets into actionable insights. Reduced manual MIS reporting effort by 40% through Excel and Power BI automation.

Technical Skills

Analytics & Programming: SQL, Python, Pandas, NumPy, Exploratory Data Analysis

BI & Visualization: Power BI, Tableau, DAX, Advanced Excel, Data Visualization

Excel & Reporting: PivotTables, Power Query, MIS Reporting, KPI Reporting, Automated Reporting

Database: MySQL, SQL Queries, Data Extraction, Data Transformation

Data Management: Data Cleaning, Data Modeling, ETL, Data Validation

Business Analytics: Financial Analysis, Trend Analysis, Performance Monitoring, Management Reporting

Professional Experience

Data Analyst 2025 – 2026

Kissh (NBFC)

- Automated monthly MIS reporting using Excel and Power BI, reducing manual reporting effort by 40%.
- Engineered interactive Power BI dashboards to monitor loan portfolio performance, delinquency ratios, collection efficiency, and branch-level KPIs.
- Evaluated portfolio aging and branch-level performance to identify delinquency patterns and support portfolio monitoring and credit risk assessment.
- Wrote SQL queries to extract, transform, and validate financial records for recurring management reports and analytical requirements.
- Produced management reports covering portfolio performance, collections, delinquency, and operational KPIs to support business decision-making.

Data Analyst 2024 – 2025

Arcraft Infotech

- Created Power BI dashboards for business performance monitoring and management-level KPI reporting.
- Transformed recurring datasets using SQL, Excel, and Power Query to prepare reliable data for analytical and reporting requirements.
- Evaluated trends and variances to identify changes in business performance and recurring operational patterns.
- Automated recurring reporting processes using Excel and Power BI, improving accessibility and consistency of management information.
- Presented analytical findings through dashboards, reports, and data-driven summaries to support business stakeholders.

Data Scientist Intern 2023 – 2024

SMEC Labs

- Performed exploratory data analysis and data preprocessing using Python, Pandas, and NumPy to identify data-quality issues and underlying patterns.
- Applied feature engineering and machine learning techniques to develop and evaluate predictive models.
- Cleaned, transformed, and prepared datasets for analytical and machine learning workflows.

Projects

Sales and Profitability Analytics Dashboard *Power BI, DAX*

- Designed a multi-page Power BI business intelligence dashboard covering sales, profitability, customers, products, brands, salesmen, Emirates, and sales modes.
- Created DAX measures for Total Sales, Total Profit, Invoice Count, Average Order Value, Quantity, and other business KPIs.
- Examined monthly sales trends, customer contribution, product performance, brand performance, salesman activity, and Cash/Credit/Sample transactions.

- Applied ABC, XYZ, and FSN analysis to classify products based on contribution, demand variability, and movement.

Procurement Spend and Supplier Performance Dashboard

Advanced Excel

- Implemented an Excel-based procurement analytics solution using 777 purchase-order records to evaluate supplier activity, spending, savings, quality, delivery, and compliance.
- Established KPI summaries covering order volume, purchase quantity, negotiated spend, savings percentage, defect rate, delivery time, and supplier compliance.
- Used PivotTables and visual reporting to evaluate supplier and category performance and identify spending patterns and savings opportunities.
- Assessed order status and delivery categories including completed, pending, partially delivered, and cancelled purchases.

Loan Portfolio and MIS Analytics Dashboard

Advanced Excel

- Created an Excel-based financial analytics dashboard to monitor loan disbursement, outstanding balance, Portfolio at Risk (PAR), recovery rate, and delinquency.
- Established KPI summaries and interactive reports to assess portfolio performance, recovery trends, delinquency, and branch-level results.
- Applied PivotTables, Excel formulas, and data analysis techniques to assess loan portfolio performance and identify changes in recovery and delinquency.

Laptop Sales and Specification Analysis

Power BI, DAX

- Examined 1,200+ laptop records using Power BI and DAX to identify pricing trends, product specifications, and brand-level performance.
- Applied data modeling and DAX calculations to generate comparative product, pricing, and specification insights.

Education

Diploma in Data Science

2023 – 2024

SMEC Labs, Kochi, Kerala

Bachelor of Computer Applications (BCA)

2020 – 2023

University of Kerala, Kerala
